Skills

Python
NumPy
Pandas
Matplotlib
Nltk
Django
Scrapy
PHP
CodeIgniter
PostgreSQL
MySQL
Firebase
Git & GitHub
Docker
API
Ajax & Json
JavaScript
Ionic 4
Angular JS
Node JS
Agile

Special Qualifications

Software Development
Web Application Development
Web Crawling

Summary

Deeply interested for Data Science, Machine Learning, Deep Learning, Scraping, Algorithms and solve real world problems across different domains. Experienced and dedicated Programmer with several years of experience analyze, design and develop software systems, web application, eCommerce & native mobile apps development.

Experience

April 2019—Present
Full Stack Engineer • Utshob Group • Merul Badda, Dhaka

- Analyzed data sets and helped companies make decisions based on findings.
- Created and presented portfolios of growth, pointing out key trends with data visualization.
- Analyze, design, develop & update dynamic Web applications based on project requirements.
- PHP, Python, Node Js use for back-end development.
- Design & develop new progressive web apps with ionic 4.
- Using postman for testing API.
- REST API development and integrating third party API (Google, Facebook etc.).
- MySQL, Firebase database are used to store data.
- AJAX, Json, JavaScript used for client site scripting language.

Projects/ Other Activities

GitHub repository link:
https://github.com/DSAnup/Projects

Online coding judge profile:
https://www.hackerrank.com/anup12_m

- Preparing a work flow chart and diagram using knowledge of computer capabilities, subject matter, programming language and logic.
- Contributes to team effort by accomplishing related results as needed.
- PHP & Python used to develop and data scraping.
- CodeIgniter HMVC and MVC both used for developing web applications.
- MySQL database are used to store data.
- AJAX, Json, JavaScript used for client site scripting language.
- HTML5, CSS3, Bootstrap for font-end technologies.

February 2016—September 2016
Web Developer • NBY IT Solution • Moghbazar, Dhaka
- Using CodeIgniter MVC framework for developing web site.
- Planning & designing the architecture of the components of a new application
- Testing sites & applications in different browsers and environments.
- Learning and testing new technologies, languages.
- Gathering requirements from clients.
- Problem solving and fixing in existing projects.

Education

2013 - 2016
Bachelor of Science in Computer Science and Technology
Atish Dipnakar University of Science & Technology
Dhaka, Bangladesh.
